

Counter Reporting and Toner Ordering

JetAdvice Manager

Counter Reporting

Counter reporting in relation to pay-per-use agreements can be time consuming and not least, very difficult. To fill out a „counter card“, send it as a fax, or manually enter the data into a web page - requires that a user goes to each unit and read the counter that has to be reported – an exercise which is both time-consuming and tiresome; a manual process that brings little satisfaction for neither the customer nor the dealer involved, but nonetheless is mandatory as the information is required to make sure contractual agreements are honoured!

Today, more than 200 companies are automatically reading their counters using JetAdvice. Data collection is precise, to schedule, and by no means least, you will avoid „estimates“.

JetAdvice downloads the counters and puts them up on www.jetadvice.com.

The counter report is sent by email with all the information needed to make a statement in relation to the agreement. And you can have as many statements as you want! Data is ready when ever needed.

Toner ordering

Toner, which stands next to the printer ready to be slotted in, costs companies a lot of money. When a cartridge is changed, you must order a new one, but who should do it, and how do you ensure that the right one is ordered?

Another manual process that brings little satisfaction, to either the customer, or the dealer.

JetAdvice downloads the status of the toners and sends the data to www.jetadvice.com. The status of the toner cartridges is reviewed automatically, and compared to an agreed level for all units.

If the toner is running out, an email is sent with all the data needed to create a toner order, typically including the printer information, delivery address, contact, contract number and product number, as agreed between the customer and the dealer.

Using real-time unit data, accurate, proactive toner ordering can be achieved. It's not only toner but most of the other consumables that form part of the agreement, which are supported by JetAdvice!

Quick start!

First you create an account at www.jetadvice.com to collect all the data and then the JetAdvice Data Collector can be installed on the customer's network.

All in all, it takes around 15-20 min. and you're ready. A simple configuration determines how many networks you can collect data from. EuroForm will be on standby on the phone to give you support!

Safety is always paramount!

- so there is no reason not to get started!

We use the latest technologies from Microsoft and a carefully considered security strategy, which you can read about in the JetAdvice Security White Paper.

Did you know that JetAdvice has registered

- + 1.000 companies
- + 90.000 units (print and copy)
- + 2.5 billions of pages

About EuroForm..

EuroForm A/S is an independent software development company, based in Denmark. We are committed to adding true value to customers through providing second-to-none solutions that

optimize and enhance the use of laser printers and multifunction devices. EuroForm A/S is one of the first printer software developers to offer innovative solutions in the cloud.
